

Automatic Transmission Conditioner

Product Description:

The Automatic Transmission Conditioner considerably reduces friction, ensures smooth gear changing and protects seals and gaskets. It helps to optimize the life span of all automatic transmission components and significantly reduce recontamination of transmission fluids from deposits which occur with regular vehicle use. AutoProfi ATC is TUV certified and:

- Ensures optimized lubrication life of the automatic transmission
- Improves power delivery from engine to wheels for better response and handling
- Reduces operating friction, component wear and tear and the resulting maintenance costs.

Use in all cars with automatic transmissions.

Directions for Use:

Use as needed to smoothen gear-shifting and improve power delivery.

1. Ensure the vehicle engine is OFF.
2. Locate the automatic transmission fluid reservoir.
3. **FOR CARS:** Remove 8 ounces (approximately 250ml) of transmission fluid from the reservoir and replace with AutoProfi ATC.
4. **FOR TRUCKS:** Remove 5% of the volume of transmission fluid from the reservoir; replace with equivalent amount of ATC. This may require more than 1 bottle of AutoProfi ATC.
5. Enjoy smoother, safer and more responsive driving.

Technical Specifications:

Application Fields: For all vehicles with automatic transmission

Reaction Time: Works during operation

Consumption: 250ml for cars; 5% of transmission fluid volume for trucks

Packaging Units: 250 ml

Part Number: 43236
