

Klima Fresh Air Condition Clean & Refresh

Product Description:

Klima Fresh cleans and disinfects your Air Conditioning System effectively removing unpleasant odors. Originally engineered to disinfect tough environments like commercial trucks and city buses, Klima Fresh works through the vehicle's AC system to eliminate bacteria, mold, spores and other microorganisms, and to prevent their re-growth. Klima Fresh uses a nonflammable propellant, is non-toxic, hypo-allergenic and:

- Helps to keep the air inside the vehicle clean, fresh and healthy
- Disinfects and deodorize upholstery and carpets
- Optimizes cooling performance and extends the life of the AC System

Directions for Use:

Once every 6 months – and especially after replacing your cabin air filter - use Klima Fresh to keep the environment inside the vehicle clean and healthy. *Vehicle preparation (Steps 1-3) is very important as humidity within the AC System can impair the cleaning effect.*

1. Start the engine and make sure the Air Conditioning is OFF.
2. Set the **air flow** to **recirculation** on **full fan power** and **maximum temperature**.
3. Run the system for 5-10 minutes.
4. Place Klima Fresh in the footwell of the front passenger area.
5. open all dashboard vents, switch on the AC System and set to air recirculation on full fan power and **minimum** temperature.
6. Depress the nozzle lever into lock-down position and close the vehicle doors.
7. Let the AC System run for 3-5 minutes more minutes and then thoroughly air the interior of the vehicle

Technical Specifications:

Application: Passenger cabin of all vehicles.

Reaction Time: Less than 5 minutes

Consumption: 100 ml for 1 application

Frost susceptibility: No

Available container size: 100ml aerosol

Part Number: 43209
