

Nano Engine Protect

Product Description:

The highly effective anti-friction Nano-technology seals all the internal surfaces of engines and equipment with a protective-barrier. Nano Engine Protect ensures that seals, shaft seals and O-rings remain supple. It's TUV certified to perform and provides:

- Highly effective wear protection
- Improved oil flow during cold start
- Smoother and quieter engine running
- Optimized engine performance and extended life

Direction for Use:

After changing your oil, add Nano Engine Protect to your oil. For best results, be sure to clean oil system with AutoProfi Engine Clean before changing the oil.

1. Ensure engine is OFF.
2. Add 1 bottle (250ml) to the Engine oil.
3. Enjoy driving a performance-optimized vehicle.

Specifics:

Application Fields: For use in all vehicles with petrol (gasoline) and diesel engines

Reaction Time: Works during operation

Consumption: 250 ml is sufficient to treat up to 5 quarts (5 liters) of oil

Packaging Units: 250 ml

Part Number: 43218
